

I-190/Silver Street Interchange Project

TEMPORARY CLOSURE NOTICE

The temporary gravel access road between Philadelphia and Silver Street will be temporarily closed for approximately one month in order to install underground utilities (sanitary sewer, water, and storm sewer).

The closure will begin next **Wednesday, August 3** and remain closed through August. It is scheduled to reopen on **September 2, 2016**.

The access road will be closed from the intersection of the gravel access road and Silver Street to the intersection of Philadelphia and 11th Street, allowing access to all residences along Silver Street and Philadelphia Street in the vicinity of the access road.

Although the temporary road will be closed, a single lane will be maintained for Emergency Services access. **The full closure will allow a significant time reduction for utility installation through the intersection instead of sequencing the utility work while maintaining traffic.**

Thank you for your patience regarding this temporary closure. If there are any questions or concerns, please contact:
